GLOSSY GEL HEAVY BODY PASTE

ON GLASS

Heavy Glossy Gel on glass gives volume, becomes transparent and never turns yellow.

It is a new medium that helps creatives in many different ways. It can be used with stencils, to make three-dimensional surfaces or to create special effects, like "Crocco". It can even be used as a strong glue for heavy decorative items (such as metal decorations).

We like to employ it for our projects decorations. Once dry, this special paste becomes transparent, giving volume to our creations.

A STRONG GLUE

*Use it like a glue, to apply wooden decorations or metal items.
It glues strongly and becomes transparent once dry.*
