KE36M - Wash It Finish
KR02 - Sponge Brush
KR32 - Flat Brush
KR25 - Decoupage scissors

Bisquit ceramic white mugs (if you choose a different material, you should apply some white primer on the background)
Masking Tape

1- Mask the upper side of the mug (about 0,8 mm), using some masking tape. Apply Aquacolor on all the surface with a sponge brush. Spray some water with a nebulizer, to create interesting shades.

2- Using a pencil, design a line at about 1/3 of the mug height, starting from bottom. Trace the line on the handle, too.

3- Apply the gilding glue on the mug, starting from the bottom side until the line. Spread the product with the flat brush.

4

4- Apply the silver glitter on the mug over the gilding glue. Cover all this surface, then eliminate the excess, by shaking the mug.

5

5- Select your favourite Rub On designs, cut them from the sheet and remove the adhesive film on the back.

6

6- Apply the design on the mug surface, press a lot on all the design.

7- Remove gently the protective transparent film on the design.

8- Protect your project by applying some Wash It Finish on all the surface.
